Critical Thinking (Stanford Encyclopedia of Philosophy)

Read PDF A Critical Thinking And Application Nclex Review Student Manual

Critical thinking is thinking that questions itself. That is to say, it is a process of thinking that self-corrects errors using evidence and systematic elimination of biases, unstated assumptions, motivated reasoning and logical fallacies. The following are illustrative examples of critical thinking.

Critical thinking is what people outside the field of education call "having a discussion." It relies on an exchange of ideas in which the ideas evolve from one volley to the next. Many high school students are great at absorbing information but not accustomed to the assertiveness, improvisation, and individuality that critical thinking entails.
