Michael Pawlyn (born 30 September 1967) is a British architect noted for his work in the field of biomimetic architecture and innovation. He was part of the principal team of architects that conceived and designed The Eden Project and is a regular keynote speaker at events on innovation and environmental sustainability.

### **Michael Pawlyn - Wikipedia**

How can architects build a new world of sustainable beauty? By learning from nature. Michael Pawlyn describes three habits of nature that could transform architecture and society: radical resource efficiency, closed loops, and drawing energy from the sun.

### **Michael Pawlyn: Using nature's genius in architecture ...**

Biomimetic architecture is a contemporary philosophy of architecture that seeks solutions for sustainability in nature, not by replicating the natural forms, but by understanding the rules governing those forms. It is a multi-disciplinary approach to sustainable design that follows a set of principles rather than stylistic codes.
