Clinical Neuropsychology Degree and Career Guide. The American Psychological Association (APA) defines neuropsychology as a branch of psychology “that studies the physiological processes of the nervous system and relates them to behavior and cognition.”¹ In other words, neuropsychologists study how biological processes in the brain and other parts of the nervous system are reflected in people’s thoughts, feelings, and behaviors.

Applied Clinical Neuropsychology An Introduction

BRAIN (Be Ready for ABPP In Neuropsychology) was started in 2002 by about a dozen friends who felt the best way to tackle the ABPP/ABCN board certification process was to support one another, apply a little friendly peer pressure to complete the process in a timely manner, and divide the work load (e.g., chapter summaries, review of work samples).
