### Fetal Pig Dissection Lab Whitman

Virtual Fetal Pig Dissection. Welcome to the Whitman College Biology Department's Virtual Pig Dissection (VPD)! This site is designed as a supplement to laboratory dissections exploring introductory mammalian anatomy and physiology — it is basic and many details have been omitted for clarity. We hope that it is suitable for AP Biology students or for students of introductory anatomy and physiology at the college level.

### Fetal Pig Dissection Lab Whitman Answers

This is a female fetal pig viewed from a ventro-posterior viewpoint. Note the umbilical cord and the two rows of nipples (mammary papillae) on the ventral surface. In the female, both the urogenital tract and the digestive tract exit at the anal region. Only the female has a urogenital papilla; it is ventral to the anus.

### Is it a female? | Whitman College

This image shows a cross section of the fetal pig heart, created by cutting through the ventricles of the heart at the level indicated. The ventricles are separated by the interventricular septum.The atria are also separate from one another, so that the de-oxygenated blood of the right chambers is kept separate from the oxygenated blood of the left chambers.

The fetal pig that you will dissect has been injected with a colored latex (rubber) compound. The arteries have been filled with red latex and the veins with blue. An incision was made on the side of the neck to enable the injections. The incision can be seen in the first photograph below.

### Reading: Fetal Pig Dissection | Biology II Laboratory Manual

The purpose of the dissection of the fetal pig will give us a stronger understanding on the internal system. The reason why it will give us a stronger and better understanding of the internal system is simply because the fetal pig is a mammal, like humans. Almost all major structures are the same or similar in anatomy.
