Honda Small Engine Starters & Alternators | R&S

This can cause the engine not to start, or only run for a few minutes, then quit. POSSIBLE SOLUTION: Leave the cap to dry out or replace with a new cap. Possible cause 2: There is oil inside of the breather tube, which is connected to the carburetor. Oil can then soak into the air filter, causing a restriction and the mower to not start, or run ...

Small Engine Starters & Alternators | R&S

On the small engines most of us are working on you can bet that if you can't rotate it by hand, it's probably seized. On larger engines you'll want to use a breaker bar to see if it will turn. Assuming everything is okay with the crankshaft, the easiest and cheapest thing to try is penetrating oil.
