1 First steps of debugging and how to contact MikroTik support team; 2 Firewall. 2.1 Basic router protection based on connection state and IP address type by using Firewall; 2.2 Block specific domains by using scripts; 2.3 Ease load on firewall by sorting firewall filter, NAT and mangle rules; 2.4 Ease load on firewall by using no-mark as a mark for packets and connections

Tips and Tricks for Beginners and Experienced ... - MikroTik

The Mikrotik firewall, based on the Linux iptables firewall, is what allows traffic to be filtered in, out, and across RouterOS devices. It is a different firewall implementation than some vendors like Cisco, but if you have a working knowledge of iptables, or just firewalls in general, you already know enough to dive in. Understanding the RouterOS firewall is critical to securing your devices and

Firewall - MikroTik Wiki

Mikrotik doesn't call it port forwarding but you can make special rules in Firewall -> NAT. In here you add a dst-nat rule to the dstnat chain, which redirects traffic to an internal network address and port. Here's someone else's port forwarding guide. A Mikrotik router can also do the opposite of port forwarding.
