### Mini R56 Engine Warning Light

This warning light comes on when you have low oil or low oil pressure. This warning light is red for a reason, because the longer you drive with it on, the more internal damage will occur in your engine. Stop the vehicle when you see this light and check the oil using the dipstick. Add more oil if needed, but don't drive with this light on. Figure 5. Engine oil warning light.

The check engine light only comes on in certain conditions: If the check engine light is coming on intermittently, be sure to notice any changes in the performance of your vehicle when the light is on. If you do notice a difference, try driving your vehicle as little as possible until you can bring it in for service.

### MINI Check Engine Light On? | Common Symptoms & What to Do ...

Transmission overheating light. The Mini warning light cog with thermometer indicates that the transmission is overheating. The severity of the problem is determined by the colour of the symbol. Red indicates overheating and requires that you stop the vehicle to allow the transmission to cool down before continuing. Yellow indicates a hot transmission.

### Mini Dashboard Warning Lights and Meanings

Take immediate action if check engine light is flashing. If you notice your Mini check engine light is flashing, please turn your engine off as soon as possible to avoid damaging your engine and entire vehicle. A flashing check engine light requires much more prompt attention and indicates a severe condition that must be looked at immediately to avoid damaging your Mini's catalytic converter. If the catalytic converter is damaged then there's a good chance the entire engine will then ...

### Reasons Why Check Engine Light Is On In Mini Cooper ...

Mini electronic power control (EPC) warning. EPC is a computerised ignition and engine management system. This warning light usually signifies that there's something wrong with the throttle system, and is often accompanied by other warning lights such as the check engine light or the stability control warning light.

The car's check engine light came on but car was running fine. It turned off when I parked the car for an hour and turned it back on. The last time it did this was after I had the oil changed. I turned it on this morning and it misfired and started to putter. I let it run for a while and proceeded to take it to mechanic.(Dealership is 238 miles away) He said it needed all new spark plugs and coil!
