WD-65835, WD-73835 OWNER'S GUIDE

This is a common problem on DLP TV sets. Essentially, these TVs use a "DLP" chip to produce the picture. This chip contains numerous tiny mirrors. When these mirrors start to fail, spots appear on the TV screen. If the DLP chip is not replaced, the problem can worsen. In the meantime, there are no settings which can be adjusted to fix this issue.

DLP TV Troubleshooting Questions Answered

The steps may vary from your model, but should be similar. Press "Menu" on the remote control and then press "Support." Press "Self-Diagnostic" and then press "Sound Test." Your TV's sound is not defective if you do not hear any buzzing. Refer to your owner's manual on how to perform a sound test for your specific plasma TV model.
