New Edge of the Anvil : Blacksmith

I see in Jack Andrews's book "New Edge of the Anvil" that he recommends: "From the shoulder to the mid point develop the edge to 3/8" radius. Blend this radius into 1/4" radius from the mid point to the heel. The edge of the heel can be either sharp or rounded."

The Anvil's Edge

The primary work surface of the anvil is known as the face. It is generally made of hardened steel and should be flat and smooth with rounded edges for most work. Any marks on the face will be transferred to the work. Also, sharp edges tend to cut into the metal being worked and may cause cracks to form in the workpiece.

Anvil - Wikipedia

To further inspire and to show the new focus of blacksmithing in the metal arts, six contemporary metalworkers show a series of demonstration pieces of their iron work. The New Edge of the Anvil is a revised and expanded edition of Andrews earlier and most successful book.
