A few limit problems, like plug-and-chug problems, are very easy to solve. Just plug the arrow-number into the limit function, and if the computation results in a number, that’s your answer (but see the following warning). For example, (Don’t forget that for this method to work, the result you get after plugging in must be […]

Chapter 8 Plug & Chug Answers: Assuming that the 20 N force acts in the same direction that the object moves, work = Fd = (20 N)(3.5 m) = 70 J (a) Since the 500 N force to lift the barbell is in the same direction that the barbell moves, work = Fd = (500 N)(2.2 m) = 1100 J. (b) After the barbell is lifted, its potential energy = the work done to lift it = 1100 Joules.
