The North Pacific Research Board's (NPRB) Arctic Program is the newest integrated ecosystem research program (IERP) to date. The Arctic Integrated Ecosystem Research Program (IERP) will invest approximately \$18.6 million in studying marine processes in the northern Bering and Chukchi Seas in 2017-2021, beginning in the summer of 2017.

About the Program - NPRB Arctic Program

It is one of the leading oceanography institutes in China and mainly engaged in the ocean scientific research on Chinese marginal seas, open oceans and polar seas as well as the R&D of the high technology for the oceanic environment and resources investigation and survey. It owns one national key laboratory - State Key Laboratory of Satellite ...

UArctic - Second Institute of Oceanography, Ministry of ...

There are two oceans in Earth's polar regions. The Arctic Ocean is in the north polar region.; The Southern Ocean is in the south polar region.; The oceans that are in the polar regions are a bit different from other oceans on Earth. There is often sea ice at their surface, especially during the winter months. And those chilly waters are home to some unique marine life.

2002, Vladimir A. Volkov, Ola M. Johannessen, & Victor E. Borodachev, Polar Seas Oceanography: An integrated case study of the Kara Sea, →ISBN: The rest of the marked front-like features are believed to appear due to complex processes of riverwater and seawater interaction.

riverwater - Wiktionary

The Kara sea is part of the Arctic ocean North of Siberia. It is separated from the Barents sea to the West from the Kara Strait, Novaya Zemlya, and the Laptev sea to the East of the Severnaya Zemlya archipelago. It is named for the Kara river, which is now insignificant, but which play an important role in the Russian conquest of Northern Siberia.

Kara Sea - sea .. Info | About | What's This? | google-wi

Scientists, researchers, and students of Physical Oceanography, Atmospheric Physics, Climatology, and Marine Geology and Geophysics will find this work an integrated resource in our evolving view of the history, present conditions, and future character of the Nordic Seas and related global phenomena.
