between assets leads to diversified and optimal portfolios as well as the consequences ...

Portfolio and Risk Management | Coursera

The traditional theory of portfolio postulates that selection of assets should be based on lowest risk, as measured by its standard deviation from the mean of expected returns. The greater the variability of returns, the greater is the risk. Thus, the investor chooses assets with the lowest variability of returns.

Markowitz Theory of Portfolio Management | Financial Economics

portfolio theory was developed by Markowitz. Portfolio theory can be simply defined as, the use of decision-making tools to solve the problem of managing risky investment portfolio (see Nawrocki). Some of the basic building blocks of modern portfolio theory is the mean-variance efficiency frontier
