'Food sovereignty' is understood here as a transformative process that seeks to recreate the democratic realm and regenerate a diversity of autonomous food systems ...

Rethinking Agricultural Policy Regimes 18 Research In ...

In addition to research and development, policy regimes and market demand influence the amount of food farmers produce. Food production is one of several goals in agricultural policy in many high-income countries, not only in Norway (Meld. St. 11, 2016–2017) but also in the EU (European Commission, 2010).

Food, farmers, and the future: Investigating prospects of ...

Rethinking Food and Agriculture shows how the modern food disruption, made possible by rapid advances in precision biology and an entirely new model of production we call Food-as-Software, will have profound implications not just for the industrial agriculture industry, but for the wider economy, society, and the environment.
