Pattern making is the process of creating the ‘Project’ of the shoe upper made by the various parts of upper and lining, so that these can be cut from leather or
another material and then joined together by sewing to form the desired 3D shoe design. But pattern making also extends to other components, such as the insole, heel and wedge

**5-FOOTWEAR PATTERN MAKING - Shoe learn**
Starting with a custom shoe last, a
walking shoe pattern that was designed for that last, a few simple hand tools and one sewing machine, follow the handcrafting of a pair of shoes. The shoe last, the solid form the shoe is formed over, was custom made for the craftsman’s foot. The walking shoe pattern was developed for that specific shoe last.

Design, find or purchase a blueprint for your shoe. Before you think about making your shoe, it's important you
have an accurate and well-detailed set of plans to work on. After all, you don't want to be making design decisions on the go; shoemaking is a very precise business, and the slightest mishap could keep the shoe from turning out well.
