Spare And Found Parts
Spare and Found Parts is a futuristic story set in a world that was nearly destroyed by some kind of epidemic that left the majority of the population with missing body parts. Nell's father is a respected scientist who created the biomechanics that are used by those who can afford to have their missing limbs, be they arms, legs, hands or even eyes, replaced.

Spare and Found Parts by Sarah Maria Griffin
Enter lo: Nell creates a robot of sorts, using spare and found parts, such as a ladder (for the spine), a mannequin hand, and a teakettle (for the head). An illicit, stolen computer provides the brain. Not quite sci-fi, not quite fantasy, this quirky nod to Frankenstein will delight some readers and confuse others.
