Rob Winch Rob Winch is employed by Pivotal as the project lead of security related projects within Spring. He is also a committer on the core Spring Framework and co-author of the Spring Security 3.1 book. In the past he has worked in the health care industry, bioinformatics research, high performance computing, and as a web consultant.

Team | Rob Winch - Spring

I have added Spring Security's `<global-method-security>` element to my application context but if I add security annotations to my Spring MVC controller beans (Struts actions etc.) then they don't seem to have an effect.

Spring Security Reference

43.3. Spring Security Architecture Questions 43.3.1. How do I know which package class X is in? 43.3.2. How do the namespace elements map to conventional bean configurations? 43.3.3. What does "ROLE_" mean and why do I need it on my role names? 43.3.4. How do I know which dependencies to add to my application to work with Spring Security? 43.3.5.
