For example, vertigo, defined as an illusion of movement, indicates an imbalance within the vestibular system. However, just because a patient reports "vertigo" does not mean that the cause is a vestibular disorder; similarly, just because a patient denies vertigo does not mean that a vestibular disorder is excluded.

Cherchi, M. and T. Hain (2010). Provocative Maneuvers for Vestibular Disorders. Vertigo and Imbalance: Clinical Neurophysiology of the Vestibular System. S. Eggers and D. S. Zee (Editors) , Elsevier. Hain TC. Approach to the Vertigo Patient In J. Biller (ed). Practical Neurology 2nd edition, Lippincott-Raven, Philadelphia, (2008)

Dr. Timothy Hain - Chicago Dizziness and Hearing:

Vertigo is a sensation of feeling off balance. If you have these dizzy spells, you might feel like you are spinning or that the world around you is spinning.

Vertigo: Causes, Symptoms, and Treatment

Vertigo—a sensation of rotation or linear movement of self or surroundings—occurs in discrete attacks that typically have an acute onset and are caused by neuro-otologic conditions. 2 Symptoms may last for seconds (benign paroxysmal positional vertigo [BPPV]), hours (Meniere's disease), minutes to days (vestibular migraine), or weeks (vestibular neuronitis).

Strategies for managing patients with chronic subjective ...

This is an unexplained phenomenon: vertigo implies a right/left vestibular imbalance, and simultaneous, bilateral vestibular loss would be expected from a systemic ototoxin. The vertiginous episodes wane after a few days as the vestibular function is ablated.

The key signs and symptoms of vestibular neuritis are rotatory vertigo with an acute onset lasting several days, horizontal spontaneous nystagmus (with a rotational component) toward the unaffected...

(PDF) Vestibular Neuritis

Dizziness and imbalance frequently affect the elderly and contribute to falls and frailty. In many geriatric patients, clinical testing uncovers a dysfunction of the vestibular system, but no specific etiology can be identified. Neuropathological studies have demonstrated age-related degeneration of ...

Molecular aging of the mammalian vestibular system

Such dizziness can last minutes to hours. A general sensation of imbalance occurs with head movement and/or with movement in the environment (like looking out of window of a fast-moving train, plane, or vehicle). Headache may accompany the dizziness and neck pain. Generally, as neck pain reduces so does the dizziness.
